YALLAPU RAJANARAYANA

Senior Test Engineer | Test Automation (Playwright, Selenium) | API Testing

Bangalore, India | +91 7382231180 | rajnarayana1180@gmail.com | linkedin.com/in/Vanity

PROFESSIONAL SUMMARY

Senior Test Engineer with 5 years of experience in test automation across Banking, Telecom and Healthcare. Strong in Playwright (TypeScript) and Selenium (Java), REST API testing (Rest Assured, Postman), SQL data validation and Jenkins CI/CD. Built hybrid, BDD-based automation frameworks covering UI, API and database layers, improving release quality in Agile Scrum teams.

CORE SKILLS

Automation Tools: Playwright (TypeScript), Selenium

Programming: TypeScript, Java, JavaScript, C#

Frameworks & BDD: Page Object Model, Hybrid and Data-Driven Frameworks, TestNG, NUnit, Cucumber, SpecFlow

API Testing: Rest Assured, Postman, RestSharp

Database: SQL

CI/CD & Version Control: Jenkins, Git, GitHub

Tools: Jira

Methodologies: Agile Scrum, STLC, Bug Life Cycle, Regression, Smoke and Sanity Testing, Cross-Browser Testing

PROFESSIONAL EXPERIENCE

Senior Test Engineer — Asics Technologies Pvt Ltd **Oct 2021 – Present**

- Develop and execute automation scripts using Playwright and Selenium; built hybrid frameworks combining UI and API testing.
- Perform API testing with Rest Assured and Postman and validate backend data using SQL queries.
- Integrated automation suites with Jenkins CI/CD pipelines; designed end-to-end test scenarios covering UI, API and database layers.
- Identified critical defects early in Agile sprints, improving release quality and reducing regression effort.
- Logged and tracked defects in Jira and worked closely with developers to get issues resolved.
- Participated in Agile ceremonies including sprint planning and daily stand-ups.

Software Intern — Gray Radiant Data Services **Nov 2020 – Jul 2021**

- Assisted in manual and automation testing; created and executed test cases for web applications.
- Supported defect tracking and reporting using Jira.

KEY PROJECTS

Trade Surveillance & Market Abuse Detection System

Client: JP Morgan Chase | Domain: Investment Banking

Real-time monitoring of trading activity to detect insider trading and market manipulation and raise alerts for compliance teams.

- Built a Playwright + TypeScript framework (Page Object Model, reusable utilities, data-driven tests) for trading dashboards and surveillance workflows.
- Automated end-to-end workflows (alert generation, investigation, compliance reporting) with cross-browser runs on Chromium, Firefox and WebKit.
- Performed API testing with Postman and Rest Assured on trade validation services; validated large volumes of trade data using SQL.
- Validated rule engines that detect suspicious trading patterns; wrote Cucumber BDD feature files for surveillance scenarios.
- Integrated suites with Jenkins for scheduled regression; covered regression, smoke, sanity and negative testing, improving coverage of compliance workflows.
- Logged and tracked defects in Jira and collaborated with developers for resolution.
- Participated in Agile Scrum ceremonies including sprint planning, reviews and retrospectives.

Network Fault Monitoring & Ticketing System

Client: AT&T | Domain: Telecom

Real-time detection of network faults and outages with automatic incident ticket creation and routing to support teams.

- Automated UI testing of monitoring dashboards with Selenium and Playwright; created Cucumber BDD scenarios for fault management workflows.
- Performed API testing with Postman and Rest Assured on ticketing services; validated network event data and incident logs using SQL.
- Tested end-to-end incident creation-to-resolution lifecycle and integration between monitoring tools and ticketing systems.
- Ran negative testing for invalid alerts and false positives and regression for system updates; integrated execution with Jenkins pipelines.
- Improved monitoring accuracy and reduced downtime-related defects through effective test validation.
- Performed cross-platform testing of web applications; logged and tracked defects in Jira.
- Participated in Agile ceremonies and sprint activities.

Clinical Trial Management & Patient Data Tracking System

Client: Pfizer | Domain: Healthcare

Platform for tracking patient enrollment, treatment data and outcomes with regulatory compliance and secure handling of patient information.

- Automated UI testing of trial management modules with Selenium and Playwright; created Cucumber BDD feature files for trial scenarios.
- Performed API testing with Rest Assured on patient data services; validated clinical data and patient records using SQL.
- Tested end-to-end patient enrollment and monitoring workflows and integration between hospital systems and research databases.
- Ran regression, negative (invalid patient data) and cross-browser testing; integrated suites with Jenkins CI/CD.
- Ensured compliance with healthcare data standards and improved data accuracy and system reliability through testing.
- Logged and tracked defects in Jira; participated in Agile sprint planning and execution.

EDUCATION

B.Tech (Lateral Entry), Mechanical Engineering — Gates Institute of Technology **2018 – 2021**
